To Whom it May Concern,

Stefanutti Construction Pty Ltd. is a privately run business based in the Illawarra specialising in Civil Engineering and Plant Hire. Stefanutti was approached by National Biofuels Group in late 2008 with regards to their Soy BioDiesel products.

With a fleet of more than 35 machines comprising of heavy earth moving machinery and light vehicles, we at Stefanutti were more than willing to reduce our carbon foot print. The product which National Biofuels Group demonstrated to us was certainly a product which was going to allow Stefanutti to reduce its carbon emissions. In early 2009 Stefanutti was one of the first businesses in the Illawarra to start using B20%. We strongly support National Biofuels Group and are happy with the results of their B20% Soy Biodiesel.

Stefanutti endorse the quality, consistency and reliability of National Biofuels products and look forward to the day it is freely available at all petrol outlets in Australia so all Australians are able to benefit from this great product, including our environment.

Regards

Lisa Stefanutti
