

BIODIESEL TESTIMONIAL

JACK JOHNSON

Jack Johnson's 2005 summer tour not only brought good vibes and smiles to music fans around the US and Canada, it was also a showcase of impressive eco-friendly tour activities.

The tour ran all buses and trucks on biodiesel fuel. Bio Diesel is a clean burning alternative fuel, produced from domestic, renewable resources. It is nearly carbon-neutral, meaning it contributes almost zero emissions to global warming!

A 1998 biodiesel lifecycle study jointly sponsored by the U.S. Department of Energy and the U.S. Department of Agriculture, concluded biodiesel reduces net carbon dioxide emissions by 78 percent compared to petroleum diesel.

The tour used 80,000 litres of biodiesel fuel, which saved 89 tons of CO₂ emissions from going into the air.

FUEL FOR OUR FUTURE
